

National Conservation Council

Sea Turtle Species Conservation Plan

The National Conservation Council (NCC) is seeking public comment on a plan to conserve and protect Cayman's sea turtle species. The NCC resolved on 19 June, 2019 to send the Conservation Plan out for public comment. The public comment period begins on 3 July, 2019 and ends 9 Sept., 2019.

The Conservation Plan as proposed includes: Certain turtle-friendly lighting requirements, no driving rules and other protections for turtle nesting beaches, rules for human interaction with wild turtles and other protective measures.

Copies of the Conservation Plan may be obtained at the Department of Environment (DoE) offices at 580 North Sound Road, at the Government Administration Building on Elgin Avenue or online at www.doe.ky. In the Sister Islands, copies may be obtained at the district administration buildings. Copies will also be distributed to libraries in all three islands.

Any comments on the proposal may be received at the DoE offices, mailed to PO Box 10202, Grand Cayman KY1-1002, or sent via email to Conservation Council@gov.ky.
